25X1X

- 25X1X 1. At Valea-Neagra, near Navodari, new brick barracks, an administration building, a canteen, and two warehouses for keeping heavy vehicles, have been constructed.
2. Four to five Skoda-make excavators have been working in the above area where the canal comes from Cernavoda to the Black Sea. They have a capacity of three cubic meters for digging, and they are on treads. Eight excavators were unpacked.
3. A railroad line is being constructed in the same area, and other excavators are being used for digging.
4. A sketch of the Valea-Neagra area is attached.
